

Omar Mohamed

Flutter Developer — Mobile Application Engineer

Cairo, Egypt — omar.mohamed.flutter@gmail.com — +20 106 506 7453

LinkedIn — GitHub — Portfolio

PROFESSIONAL SUMMARY

Flutter Developer focused on building scalable and production-ready mobile applications using Flutter, Clean Architecture, Bloc/Cubit, and Firebase. Experienced in developing real-time systems, optimized networking layers, reusable UI components, and maintainable application architecture with strong attention to performance optimization and clean code practices.

TECHNICAL SKILLS

Languages: Dart
Frameworks & Tools: Flutter, Firebase, Dio, SQLite, Shared Preferences, Firebase Cloud Messaging (FCM), Cloudinary
Architecture & State Management: Clean Architecture, Feature-Based Architecture, Bloc/Cubit, TDD
Core Concepts: REST APIs, Responsive UI, Performance Optimization, Reusable Components, Caching, Pagination
Version Control: Git, GitHub

FEATURED PROJECTS

- Piko** – Real-Time Chat Application | *Flutter, Firebase, Bloc/Cubit* | [GitHub](#) 2025
- Built a real-time chat application using Flutter, Firebase Firestore, and scalable Bloc/Cubit architecture.
 - Implemented typing indicators, online/offline presence, instant synchronization, and optimized rebuild behavior using Streams.
 - Integrated Cloudinary and Firebase Cloud Messaging (FCM) while improving rendering performance and responsive UI behavior.
- Checkmate Elite** – Chess Application | *Flutter, Clean Architecture, Bloc* | [GitHub](#) 2025
- Developed a chess application featuring scalable architecture, advanced game-state management, and responsive UI systems.
 - Applied Clean Architecture and granular Bloc-based state management for maintainable gameplay behavior.
 - Implemented smooth animation systems and optimized rendering performance using reusable UI components.
- RCKeyBoard** – Custom Android Keyboard | *Kotlin, Android IME, SQLite* | [Play Store](#) 2026
- Engineered a high-performance Android Input Method Engine (IME) using Kotlin, optimizing for low-latency text rendering, multi-touch responsiveness, and precise cursor control.
 - Built a privacy-first prediction engine with local learning capabilities, utilizing a secure local database for contextual suggestions, auto-correction, and real-time inline mathematical equation solving.
 - Architected advanced security and UX features, including automatic sensitive field detection to disable data collection, a self-clearing secure clipboard manager, and dynamic UI theming.
- Wallix** – Wallpaper Application | *Flutter, Dio, Dartx, Bloc* | [GitHub](#) 2025
- Developed a wallpaper application featuring categorized wallpapers, favorites, and smooth infinite scrolling.
 - Implemented scalable networking using Dio with interceptors, pagination, caching, and centralized error handling.
 - Implemented image editing features including cropping, blur effects, and responsive rendering optimizations.

EXPERIENCE

- Flutter Developer** Sep 2024 – Present
Freelance Remote / Cairo, Egypt
- Developed and deployed production-ready Flutter applications using scalable architecture patterns and reusable components.
 - Architected maintainable state management solutions using Bloc/Cubit while reducing unnecessary widget rebuilds.
 - Integrated Firebase services, REST APIs, and optimized networking layers using Dio and structured error handling.
 - Collaborated using Git and GitHub while following clean version control and scalable project organization practices.

OPEN SOURCE

- Maintained and published multiple open-source Flutter projects on GitHub with reusable architecture and scalable code structures.
- Built reusable UI systems, networking layers, custom widgets, and Flutter experiments across multiple repositories.

EDUCATION

- Al-Alsun Higher Institute** 2023 – Present
BSc in Business Information Systems Cairo, Egypt

CERTIFICATIONS

- Flutter & Dart - Build iOS and Android Apps** | *Udemy*
- Completed 42+ hours covering Flutter development, Dart fundamentals, Firebase integration, and Bloc/Cubit architecture.

LANGUAGES

- Arabic:** Native
English: Professional Working Proficiency
