PROFESSIONAL SUMMARY

Results-driven Flutter & Mobile Application Developer with 2+ years of experience designing, building, and publishing scalable cross-platform and native Android applications. Proven track record of shipping production apps to Google Play reaching **500K+ total downloads** and open-source packages to pub.dev. Strong expertise in Clean Architecture, BLoC/Cubit, real-time sync, and custom UI/UX.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Kotlin, Java, SQL, Flutter SDK, Android SDK, Android IME (Input Method Service)
Architecture & State: Clean Architecture, MVVM, Feature-Based Modularization, BLoC, Cubit, Dependency Injection
Networking & Backend: RESTful APIs, Dio, Firebase (Auth, Cloud Firestore, FCM), WebSockets / Streams, Cloudinary
Storage & Tools: SQLite, SharedPreferences, Offline-First Caching, Pagination, Localization & RTL, Git, GitHub, Play Console, Figma

WORK EXPERIENCE

Flutter & Mobile Application Developer — **Sep 2024 – Present**
Freelance / Self-Employed — *Cairo, Egypt (Remote)*

- Architected and delivered end-to-end mobile applications from concept to production using Flutter, BLoC/Cubit, and Clean Architecture with full Localization and RTL support.
- Engineered responsive UIs, custom animations, and offline-first data flows using Dio and SQLite, implementing smart pagination and local caching to minimize network overhead.
- Integrated Firebase (Auth, Firestore, FCM) and managed full release lifecycles on Google Play Console and pub.dev, optimizing widget trees to eliminate unnecessary rebuilds and lifecycle bugs.

PRODUCTION APPS & OPEN-SOURCE PROJECTS

RCKeyboard – Native Android Keyboard (500K+ Downloads) — Google Play
Kotlin, Java, Android IME, SQLite, Custom Views

- Developed, scaled, and published a multilingual Android IME keyboard surpassing **500,000+ downloads** on Google Play, featuring custom layouts, real-time word suggestions, auto-correction, and local SQLite dictionaries.
- Engineered gesture swipe typing, precision cursor control, persistent clipboard management, and dynamic theming with optimized memory usage and background image caching.

Wallune – Wallpaper Application (1K+ Downloads) — Google Play
Flutter, REST APIs, SQLite, Custom Caching

- Built and published a fast-growing wallpaper application (**1,000+ downloads**) featuring categorized browsing, live image effects, cropping utilities, and locally persisted favorites via SQLite.
- Re-engineered content delivery by migrating from AWS to a cost-optimized static JSON architecture with structured metadata and fast client-side search indexing.

context_menu_android – Open-Source Flutter Package — pub.dev
Flutter, Dart, Custom Overlays, Animations

- Authored and published a reusable Dart package bringing iOS-style context menus to Android, featuring backdrop blur filters, spring animations, nested submenus, and a clean wrapper API.

Piko – Real-Time Messaging Application — GitHub
Flutter, Firebase Auth, Cloud Firestore, BLoC/Cubit, FCM, Cloudinary

- Engineered a real-time chat app supporting instant messaging, live typing indicators, online presence tracking, and media sharing via Cloudinary and Firestore Streams.
- Implemented granular BLoC/Cubit state isolation and FCM push notifications, significantly reducing UI rebuild overhead during high-frequency live updates.

Checkmate Elite – Chess Game Application — GitHub
Flutter, Clean Architecture, BLoC, Custom Animations

- Developed an interactive chess game utilizing Clean Architecture and BLoC to manage complex move validation, game state transitions, timers, and smooth board animations.

EDUCATION

BSc in Business Information Systems — **2023 – Present (Expected 2027)**
Al-Alsun Higher Institute — *Cairo, Egypt*

CERTIFICATIONS & LANGUAGES

Certifications: Complete Flutter & Dart Development Course – Udemy
Languages: Arabic (Native), English (Professional Working Proficiency)
